

## PLC WorkShop for Modicon Outperforms DOS Alternatives

Compared to DOS alternative,s FasTrak's *PLC WorkShop for Modicon* offers a superior PLC programming experience. Because it supports all Windows® operating systems—from Windows 95 through Windows 8—*PLC WorkShop* is highly accessible software offering exceptional ease of use. *PLC WorkShop* also supports networked printers, a feature that is not available in DOS software. Speed is provided with a full 32-bit Windows implementation, and all methods of communications are supported, including serial (COM1 – COM4), Modbus Plus including Applicom, TCI/IP, and TCP/IP to Modbus Plus Bridges..

**PLC WorkShop offers an easy transition from DOS software with documentation import from: Modicon / Taylor's MODSOFT, ProWORX Plus, ProWORX Nxt, ProWORX 32, Gray Soft's GS-COMMS and GS-WINGS, DMC, and UpDoc.**

*PLC WorkShop for Modicon* utilizes NT security management (Windows Authentication) with password protection, providing complete administrator control and auditing of all user operations.

**PLC WorkShop offers impressive functionality that obsolete software cannot match.**

<i>PLC WorkShop</i> allows you to:	You benefit by:
Open multiple PLC programs, as well as data windows, at a time	Saving time and effort when comparing PLC programs and copying components from one program to another
View real-time address Cross Reference	Eliminating the need for printing address Cross Reference
Compare files	Determining differences between programs quickly and efficiently
Concurrently connect online with multiple PLCs	Programming all of your PLCs on a single computer at the same time
Configure the user interface	Customizing <i>PLC WorkShop</i> to your specific needs and preferences
Configure printouts	Reducing your printing costs by previewing your output onscreen before you commit to paper
Record and trend real-time and historical data from multiple PLCs with <i>ControlShop</i>	Analyzing your process to minimize inefficiencies and maximize productivity
Test PLC programs before going live, and without the use of a PLC with <i>505 Simulator</i>	Accomplishing testing in a fraction of the time it would take using traditional methods, and without requiring expensive hardware
Simulate programs and I/O with predictable results every time with <i>Modicon Simulator</i>	Eliminating the hassles of physical wiring
Archive and manage program files and perform detailed program file comparisons with <i>FTVersionTrak</i>	Taking full control of your file change management activities
